Participant ID:	AT2303668
Participant Name:	JANVI KOTHARI
Test Center Name:	Arya Institute of Engineering Technology & Management
Test Date:	16/06/2023
Test Time:	2:00 PM - 4:00 PM
Subject:	IPM AT 2023

Note :
1. Options shown in green color with a tick icon are correct.
2. Chosen option on the right of the question indicates the option selected by the candidate.

Section : **Quantitative Ability SA**

Q.1 In the xy-plane let $A = (-2,0)$, $B = (2,0)$. Define the set S as the collection of all points C on the circle $x^2 + y^2 = 4$ such that the area of the triangle ABC is an integer. The number of points in the set S is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 14

Given Answer : **4**

Question ID : **355210108**

Status : **Answered**

Q.2 The polynomial $4x^{10} - x^9 + 3x^8 - 5x^7 + cx^6 + 2x^5 - x^4 + x^3 - 4x^2 + 6x - 2$ when divided by $x - 1$ leaves a remainder 2. Then the value of $c + 6$ is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 5

Given Answer : **5**

Question ID : **355210101**

Status : **Answered**

Q.3 In a chess tournament, there are four groups, each containing an equal number of players. Each player plays

- against every other player belonging to one's own group exactly once;
- against each player belonging to one of the remaining three groups exactly twice;
- against each player belonging to one of the remaining two groups exactly three times; and
- against each player belonging to the remaining group exactly four times.

If there are more than 1000 matches being played in the tournament, the minimum possible number of players in each group is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 8

Given **10**
Answer :

Question ID : **355210109**

Status : **Answered**

Q.4 If $f(n) = 1 + 2 + 3 + \cdots + (n + 1)$ and $g(n) = \sum_{k=1}^{k=n} \frac{1}{f(k)}$, then the least value of n for which $g(n)$ exceeds the value $\frac{99}{100}$ is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 199

Given **9**
Answer :

Question ID : **355210113**

Status : **Answered**

Q.5 The total number of positive integer solutions of $21 \leq a + b + c \leq 25$ is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 1160

Given **950**
Answer :

Question ID : **355210106**

Status : **Answered**

Q.6 In an election with only two contesting candidates, 15% of the voters did not turn up to vote, and 50 voters cast invalid votes. It is known that 44% of all the voters in the voting list voted for the winner. If the winner got 200 votes more than the other candidate, then the number of voters in the voting list is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 5000

Given Answer : **5000**

Question ID : **355210100**	
Status : **Answered**	

Q.7 The product of the roots of the equation $\log_2 2^{(\log_2 x)^2} - 5 \log_2 x + 6 = 0$ is ____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 32

Given Answer : **6**

Question ID : **355210103**	
Status : **Answered**	

Q.8 If $f(1) = 1$ and $f(n) = 3n - f(n-1)$ for all integers $n > 1$, then the value of $f(2023)$ is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 3034

Given Answer : **1534**

Question ID : **355210110**	
Status : **Answered**	

Q.9 If three consecutive coefficients in the expansion of $(x + y)^n$ are in the ratio 1:9:63, then the value of n is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 39

Given Answer : **29**

Question ID : **355210105**	
Status : **Answered**	

Q.10 Let a, b, c, d be positive integers such that $a + b + c + d = 2023$. If $a{:}b = 2{:}5$ and $c{:}d = 5{:}2$, then the maximum possible value of $a + c$ is ____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 1442

Given Answer : **1442**

Question ID : **355210107**

Status : **Answered**

Q.11 Amisha can complete a particular task in twenty days. After working for four days she fell sick for four days and resumed the work on the ninth day but with half of her original work rate. She completed the task in another twelve days with the help of a co-worker who joined her from the ninth day. The number of days required for the co-worker to complete the task alone would be _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 24

Given Answer : **24**

Question ID : **355210104**

Status : **Answered**

Q.12 Vinita drives a car which has four gears. The speed of the car in the fourth gear is five times its speed in the first gear. The car takes twice the time to travel a certain distance in the second gear as compared to the third gear. In a 100 km journey, if Vinita travels equal distances in each of the gears, she takes 585 minutes to complete the journey. Instead, if the distances covered in the first, second, third, and fourth gears are 4 km, 4 km, 32 km, and 60 km, respectively, then the total time taken, in minutes, to complete the journey, will be _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 312

Given Answer : **100**

Question ID : **355210111**

Status : **Answered**

Q.13 Assume it is the beginning of the year today. Ankita will earn INR 10,000 at the end of the year, which she plans to invest in a bank deposit immediately at a fixed simple interest of 0.5% per annum. Her yearly income will increase by INR 10,000 every year, and the fixed simple interest offered by the bank on new deposits will also increase by 0.5% per annum every year. If Ankita continues to invest all her yearly income in new bank deposits at the end of each year, the total interest earned by her, in INR, in five years from today will be _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 2500

Given **2500**
Answer :

Question ID : **355210112**

Status : **Answered**

Q.14 The length of the line segment joining the two intersection points of the curves $y = 4970 - |x|$ and $y = x^2$ is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 140

Given **1**
Answer :

Question ID : **355210102**

Status : **Answered**

Q.15 The remainder when $1! + 2! + 3! + \cdots + 95!$ is divided by 15 is _____.

Case Sensitivity: No

Answer Type: Equal

Possible Answer: 3

Given **3**
Answer :

Question ID : **35521099**

Status : **Answered**

Section : **Quantitative Ability MCQ**

Q.1 If a three-digit number is chosen at random, what is the probability that it is divisible neither by 3 nor by 4?

Ans

✗ 1. $\dfrac{1}{3}$

✗ 2. $\dfrac{1}{4}$

✗ 3. $\dfrac{2}{3}$

✔ 4. $\dfrac{1}{2}$

Question ID : **355210131**
Option 1 ID : **355210385**
Option 2 ID : **355210386**
Option 3 ID : **355210387**
Option 4 ID : **355210384**
Status : **Answered**
Chosen Option : **4**

Q.2 Let a, b, c be real numbers greater than 1, and n be a positive real number not equal to 1. If $\log_n(\log_2 a) = 1$, $\log_n(\log_2 b) = 2$ and $\log_n(\log_2 c) = 3$, then which of the following is true?

Ans

✗ 1. $a^n + b^n = c^n$

✗ 2. $a + b = c$

✔ 3. $(a^n + b)^n = ac$

✗ 4. $(b - a)^n = (c - b)$

Question ID : **355210132**
Option 1 ID : **355210389**
Option 2 ID : **355210388**
Option 3 ID : **355210390**
Option 4 ID : **355210391**
Status : **Answered**
Chosen Option : **3**

Q.3 A goldsmith bought a large solid golden ball at INR 1,000,000 and melted it to make a certain number of solid spherical beads such that the radius of each bead was one-fifth of the radius of the original ball. Assume that the cost of making golden beads is negligible. If the goldsmith sold all the beads at 20% discount on the listed price and made a total profit of 20%, then the listed price of each golden bead, in INR, was

Ans ✔ 1. 12000

✘ 2. 24000

✘ 3. 9600

✘ 4. 48000

Q.4 Which of the following straight lines are both tangent to the circle
$x^2 + y^2 - 6x + 4y - 12 = 0$?

Ans ✔ 1.

$$4x + 3y + 19 = 0, \ 4x + 3y - 31 = 0.$$

✘ 2.

$$4x + 3y - 19 = 0, \ 4x + 3y + 31 = 0.$$

✘ 3.

$$4x + 3y + 19 = 0, \ 4x + 3y + 31 = 0.$$

✘ 4.

$$4x + 3y - 19 = 0, \ 4x + 3y - 31 = 0.$$

Q.5 A helicopter flies along the sides of a square field of side length 100 kms. The first side is covered at a speed of 100 kmph, and for each subsequent side the speed is increased by 100 kmph till it covers all the sides. The average speed of the helicopter is

Ans   ✔ 1. 192 kmph

   ✘ 2. 200 kmph

   ✘ 3. 250 kmph

   ✘ 4. 184 kmph

Q.6 If $\cos\alpha + \cos\beta = 1$, then the maximum value of $\sin\alpha - \sin\beta$ is

Ans

   ✘ 1. 1

   ✔ 2. $\sqrt{3}$

   ✘ 3. 2

   ✘ 4. $\sqrt{2}$

Q.7

If the harmonic mean of the roots of the equation
$$(5 + \sqrt{2})x^2 - bx + 8 + 2\sqrt{5} = 0$$
is 4 then the value of b is

Ans

✗ 1. 3

✔ 2. $4 + \sqrt{5}$

✗ 3. $4 - \sqrt{5}$

✗ 4. 2

Q.8 The set of all real values of x satisfying the inequality $\frac{x^2(x+1)}{(x-1)(2x+1)^3} > 0$ is

Ans ✗ 1.

$$(-\infty, -1) \cup \left(-\frac{1}{2}, 0\right) \cup (1, +\infty)$$

✓ 2. $$\left(-1, -\frac{1}{2}\right) \cup (1, +\infty)$$

✗ 3. $$\left(-1, -\frac{1}{2}\right) \cup (0, +\infty)$$

✗ 4. $$(-1, 0) \cup (1, +\infty)$$

Q.9 Let a_1, a_2, a_3 be three distinct real numbers in geometric progression. If the equations $a_1x^2 + 2a_2x + a_3 = 0$ and $b_1x^2 + 2b_2x + b_3 = 0$ have a common root, then which of the following is necessarily true?

Ans ✔️ 1.

$$\frac{b_1}{a_1}, \frac{b_2}{a_2}, \frac{b_3}{a_3} \text{ are in arithmetic progression}$$

✖️ 2.

$$\frac{b_1}{a_1}, \frac{b_2}{a_2}, \frac{b_3}{a_3} \text{ are in geometric progression}$$

✖️ 3.

$$b_1, b_2, b_3 \text{ are in geometric progression}$$

✖️ 4.

$$b_1, b_2, b_3 \text{ are in arithmetic progression}$$

Q.10 A person standing at the center of an open ground first walks 32 meters towards the east, takes a right turn and walks 16 meters, takes another right turn and walks 8 meters, and so on. How far will the person be from the original starting point after an infinite number of such walks in this pattern?

Ans

✖️ 1. 64 meters

✖️ 2. $32/\sqrt{5}$ meters

✖️ 3. 32 meters

✔️ 4. $64/\sqrt{5}$ meters

Q.11 If $\frac{a+b}{b+c} = \frac{c+d}{d+a}$, which of the following statements is always true?

Ans

✗ 1. $a + b + c + d = 0$

✗ 2. $a = c$

✓ 3.

$a = c$, or $a + b + c + d = 0$

✗ 4. $a = c$, and $b = d$

Q.12 If $\log_{\cos x}(\sin x) + \log_{\sin x}(\cos x) = 2$, then the value of x is

Ans

✗ 1. $n\pi + \frac{\pi}{4}$, n is an integer

✓ 2. $2n\pi + \frac{\pi}{4}$, n is an integer

✗ 3. $\frac{n\pi}{4} + \frac{\pi}{4}$, n is an integer

✗ 4. $\frac{n\pi}{4}$, n is an integer

Q.13 A rabbit is sitting at the base of a staircase which has 10 steps. It proceeds to the top of the staircase by climbing either one step at a time or two steps at a time. The number of ways it can reach the top is

Ans
✗ 1. 34

✔ 2. 89

✗ 3. 144

✗ 4. 55

Q.14 In a triangle ABC, let D be the mid-point of BC, and AM be the altitude on BC. If the lengths of AB, BC and CA are in the ratio of 2:4:3, then the ratio of the lengths of BM and AD would be

Ans
✗ 1. $11:12$

✗ 2. $12:11$

✔ 3. $11:4\sqrt{10}$

✗ 4. $4\sqrt{10}:11$

Q.15 In a chess tournament there are 5 contestants. Each player plays against all the others exactly once. No game results in a draw. The winner in a game gets one point and the loser gets zero point. Which of the following sequences cannot represent the scores of the five players?

Ans ✗ 1. 3, 3, 2, 1, 1

✗ 2. 2, 2, 2, 2, 2

✔ 3. 4, 4, 1, 1, 0

✗ 4. 3, 2, 2, 2, 1

Q.16 Let $[x]$ denote the greatest integer not exceeding x and $\{x\} = x - [x]$. If n is a natural number, then the sum of all values of x satisfying the equation $2[x] = x + n\{x\}$ is

Ans

✗ 1. n

✔ 2. $\dfrac{n(n+2)}{2}$

✗ 3. $\dfrac{3}{2}$

✗ 4. $\dfrac{n(n+1)}{2}$

Q.17 If $A = \begin{bmatrix} 1 & 2 \\ 3 & a \end{bmatrix}$ where a is a real number and det $(A^3 - 3A^2 - 5A) = 0$ then one of the values of a can be

Ans ✗ 1. 1

✓ 2. 6

✗ 3. 4

✗ 4. 5

Question ID : **355210119**
Option 1 ID : **355210338**
Option 2 ID : **355210339**
Option 3 ID : **355210337**
Option 4 ID : **355210336**
Status : **Answered**
Chosen Option : **2**

Q.18 If the difference between compound interest and simple interest for a certain amount of money invested for 3 years at an annual interest rate of 10% is INR 527, then the amount invested in INR is

Ans ✓ 1. 17000

✗ 2. 15000

✗ 3. 170000

✗ 4. 150000

Question ID : **355210120**
Option 1 ID : **355210341**
Option 2 ID : **355210342**
Option 3 ID : **355210343**
Option 4 ID : **355210340**
Status : **Answered**
Chosen Option : **1**

Q.19

The equation $x^2 + y^2 - 2x - 4y + 5 = 0$ represents

Ans ✗ 1. a circle

✗ 2. an ellipse

✓ 3. a point

✗ 4. a pair of straight lines

Question ID : **355210116**
Option 1 ID : **355210324**
Option 2 ID : **355210326**
Option 3 ID : **355210327**
Option 4 ID : **355210325**
Status : **Answered**
Chosen Option : **1**

Q.20 A polynomial $P(x)$ leaves a remainder 2 when divided by $(x - 1)$ and a remainder 1 when divided by $(x - 2)$. The remainder when $P(x)$ is divided by $(x - 1)(x - 2)$ is

Ans

✗ 1. 2

✓ 2. $3 - x$

✗ 3. 3

✗ 4. $x - 3$

Q.21 The probability that a randomly chosen positive divisor of 10^{2023} is an integer multiple of 10^{2001} is

Ans

✗ 1. $\dfrac{22}{2023}$

✗ 2. $\dfrac{22^2}{2023^2}$

✓ 3. $\dfrac{23^2}{2024^2}$

✗ 4. $\dfrac{23}{2024}$

Q.22 In a group of 120 students, 80 students are from the Science stream and the rest are from the Commerce stream. It is known that 70 students support Mumbai Indians in the Indian Premier League; all the other students support Chennai Super Kings. The number of Science students who are supporters of Mumbai Indians is

Ans ✔ 1. 30 or more

✘ 2. Between 15 and 25

✘ 3. Exactly 20

✘ 4. Between 20 and 25

Q.23 Consider an 8×8 chessboard. The number of ways 8 rooks can be placed on the board such that no two rooks are in the same row and no two are in the same column is

Ans

✘ 1. 8

✘ 2. $7!$

✔ 3. $8!$

✘ 4. 7

Q.24 Let p be a positive integer such that the unit digit of p^3 is 4. What are the possible unit digits of $(p + 3)^3$?

Ans ✗ 1. 1,3,7

✗ 2. 1,7,9

✔ 3. 3

✗ 4. 4,7

Question ID : **355210136**
Option 1 ID : **355210404**

Comprehension:

A pharmaceutical company has tested five drugs on three different organisms. The following incomplete table reports if a drug works on the given organism. For example, drug A works on organism R while B and C work on Q.

		Organism		
		P	**Q**	**R**
Drug	**A**			✓
	B		✓	
	C		✓	
	D			
	E			

Following additional information is available:

- Each drug works on at least one organism but not more than two organisms.
- Each organism can be treated with at least two and at most three of these five drugs.
- On whichever organism A works, B also works. Similarly, on whichever organism C works, D also works.
- D and E do not work on the same organism.

SubQuestion No : 26

Q.26 Drug D works on

Ans ✗ 1. Only Q

✔ 2. P and Q

✗ 3. Q and R

✗ 4. Only P

Comprehension:

A pharmaceutical company has tested five drugs on three different organisms. The following incomplete table reports if a drug works on the given organism. For example, drug A works on organism R while B and C work on Q.

		Organism

SubQuestion No : 30

Q.30 **The organism(s) that can be treated with three of these five drugs is(are)**

Ans ✔️ 1. Q and R

✖️ 2. Only P

✖️ 3. Only Q

✖️ 4. P and Q

Section : **Verbal Ability**

Comprehension:

Read the following passage and choose the answer that is closest to each of the questions that are based on the passage.

The general idea of being fit is usually assumed to be exercising regularly and having a healthy diet. It's true to some extent. But this is not always the case. People don't realise that sleep also plays a crucial part when it comes to physical and mental well-being. It's a restorative process, which shouldn't be negotiable.

Hectic working hours, increasing stress levels, and an unhealthy lifestyle can cause irregular sleep patterns. These not only disturb one's daily routine, but can also hamper one's health, leading to lifestyle conditions like deranged cholesterol and diabetes. It's a preconceived notion that cholesterol and diabetes are usually genetic diseases, and unhealthy eating patterns and lifestyle exacerbate them. It is not generally known that sleep deprivation can put a person at risk of both deranged cholesterol and diabetes.

Sleep helps your body and mind repair and recharge themselves. But things can go awry if one is sleep-deprived. Insomnia can generally make the body work abnormally. It affects the mental and physical abilities to prepare the body for the next day. It leaves the brain exhausted, affecting the natural functioning of the body.

Lack of sleep can lead to higher cholesterol and blood pressure. Sleep deprivation can lower levels of leptin, a hormone that stabilises metabolism and appetite. This can also lead to obesity, if left unchecked. Sleep deprivation has been found to raise levels of ghrelin, the hunger hormone, and decrease levels of leptin, the satiety hormone. That's why people seek relief in foods that raise blood sugar. The American Academy of Sleep Medicine recommends that adults should get a minimum of seven to eight hours of sleep each night. Staying up late can lead to consuming unhealthy snacks and junk food high in carbs and sugar. All this increases the risk of Type 2 diabetes and is equally connected to obesity.

Just like any other routine, having a definite sleeping pattern can help a person maintain a cycle of rest and activity. Sleeping at the same time every day and waking up on time will encourage quality sleep. Proper relaxation of body and mind before sleeping means that one should keep the mobile phone aside for at least half an hour before bed. It helps if the room is dark and quiet. Plus, one can always read a good book or listen to soothing music which can lull one into deep sleep.

SubQuestion No : 1

Q.1 The objective of the passage is to

Ans   ✗ 1. provide medical input to the reader.

　　　✔ 2. advise the reader.

　　　✗ 3. expose the reader to disinformation.

　　　✗ 4. present psychological insights to the reader.

It affects the mental and physical abilities to prepare the body for the next day. It leaves the brain exhausted, affecting the natural functioning of the body.

Lack of sleep can lead to higher cholesterol and blood pressure. Sleep deprivation can lower levels of leptin, a hormone that stabilises metabolism and appetite. This can also lead to obesity, if left unchecked. Sleep deprivation has been found to raise levels of ghrelin, the hunger hormone, and decrease levels of leptin, the satiety hormone. That's why people seek relief in foods that raise blood sugar. The American Academy of Sleep Medicine recommends that adults should get a minimum of seven to eight hours of sleep each night. Staying up late can lead to consuming unhealthy snacks and junk food high in carbs and sugar. All this increases the risk of Type 2 diabetes and is equally connected to obesity.

Just like any other routine, having a definite sleeping pattern can help a person maintain a cycle of rest and activity. Sleeping at the same time every day and waking up on time will encourage quality sleep. Proper relaxation of body and mind before sleeping means that one should keep the mobile phone aside for at least half an hour before bed. It helps if the room is dark and quiet. Plus, one can always read a good book or listen to soothing music which can lull one into deep sleep.

SubQuestion No : 2

Q.2 As per the passage which of these sentences is not correct?

Ans ✗ 1. Irregular sleep patterns can result in health problems.

✓ 2. Regular exercising and eating healthy food alone ensure fitness.

✗ 3. One's body and mind should be properly relaxed to ensure good sleep.

✗ 4. Insufficient sleep can lead to obesity.

Chosen Option : **2**

Comprehension:

Read the following passage and choose the answer that is closest to each of the questions that are based on the passage.

The general idea of being fit is usually assumed to be exercising regularly and having a healthy diet. It's true to some extent. But this is not always the case. People don't realise that sleep also plays a crucial part when it comes to physical and mental well-being. It's a restorative process, which shouldn't be negotiable.

Hectic working hours, increasing stress levels, and an unhealthy lifestyle can cause irregular sleep patterns. These not only disturb one's daily routine, but can also hamper one's health, leading to lifestyle conditions like deranged cholesterol and diabetes. It's a preconceived notion that cholesterol and diabetes are usually genetic diseases, and unhealthy eating patterns and lifestyle exacerbate them. It is not generally known that sleep deprivation can put a person at risk of both deranged cholesterol and diabetes.

Sleep helps your body and mind repair and recharge themselves. But things can go awry if one is sleep-deprived. Insomnia can generally make the body work abnormally. It affects the mental and physical abilities to prepare the body for the next day. It leaves the brain exhausted, affecting the natural functioning of the body.

Lack of sleep can lead to higher cholesterol and blood pressure. Sleep deprivation can lower levels of leptin, a hormone that stabilises metabolism and appetite. Comprehension:

Read the following passage and choose the answer that is closest to each of the questions that are based on the passage.

Two Apple stores in Delhi and in Mumbai - opened in April 2023. Until now, Indians could buy Apple products in the country either online or through a vast network of what the company calls 'premium resellers'. Will the new-found ability to sell products directly to customers in India - the world's second largest smartphone market - impact its fortunes here? Apple has long tried to open physical retail stores in India. In 2019, the Indian government relaxed some investment rules, exempting companies selling 'cutting-edge' items, such as Apple's iPhones and iPads, from restrictions.

Apple first launched an online store in India through a website which allows users to request for customised products. Apple's decision to open physical stores in India could be the next step in its branding strategy. It is not as if this will change Apple's sales in any dramatic way, but it is still a key milestone, one that will allow Apple to deliver to Indian customers the full Apple experience.

The iPhone is still an aspirational product in the price-sensitive Indian market. When you launch an Apple store, you are basically giving a premium experience to your premium consumers. It might not pull up sales, but it pulls more people into the Apple ecosystem.

Setting up an Apple store in India is also a statement that the country is now big enough for Apple to be actually interested in expanding operations here, and comes at a time when India is rising fast as a manufacturing base for the iPhone.

Apple first began making a lower-end model of the iPhone in India in 2017. Last year, it began producing its latest model of iPhone 14 in the country, which now accounts for 5 percent of total iPhone production.

For years, Apple had relied on China's sophisticated manufacturing network to produce the bulk of its products. But analysts predict that by 2025, a quarter of all iPhones the company makes could be produced in India. Apple was already making between 5-7 percent of its products in India, and they are targeting to go up to 25 percent of their manufacturing capacity.

In 2022, Apple had a 60 percent market share in the Indian 'premium smartphone' market - which refers to mobiles that cost INR 40,000 or more, ahead of Samsung's 21 percent share. Apple is doing well across categories. The real issue will be to pull consumers to these flagship centres without alienating the partner sellers.

Apple has finally understood that India's premium market is growing, so why not be serious about it.

SubQuestion No : 7

Q.7 India is now the focus of Apple operations because

Ans ✘ 1. it has the world's second largest population.

✔ 2. it offers the benefit of a manufacturing base in addition to a market.

✘ 3. no other country has the same ease of doing business.

✘ 4. American technology companies want to reduce their reliance on China.

Each of the paragraphs given below has a sentence missing which is indicated by a blank. From the choices given below each paragraph, choose the sentence that seems most logically appropriate to complete the paragraph.

SubQuestion No : 25

Q.25 _____. Conflicts are now brewing over rivers and river basins shared by many countries around the world. This is not unexpected, given the fact that more than two hundred water bodies are shared by two or more countries. Strife over water, for example, is erupting throughout the Middle East, from the watersheds of the Nile to the Tigris and Euphrates Rivers.

Ans ✔️ 1. With water becoming increasingly scarce and development of new sources of water extremely costly, international water tensions are expected to rise

❌ 2. The world does not consider water to be the scarce resource it is

❌ 3. Fresh water is increasingly in short supply, with nearly two-thirds of the global population living in water-stressed conditions

❌ 4. It might be a cliche, but given how scarce it is, water is the new oil of the 21st century

SubQuestion No : 26

Q.26 The concept of the 'Villa' and other European ideas came to Lucknow with foreign soldiers, travellers and adventurers. For the Nawabs of Lucknow, architecture became the physical manifestation of their new status, and a way of proclaiming their alignment to the new power bloc. _____. Villas, hence, provided an ideal substitute. Europeans sold to the Nawabs the idea of villas, based on designs in publications carried by them, and often aided by memory. The building chosen as the prototype for the famous Dilkusha Kothi was a country house in Northumberland.

Ans ❌ 1. The Nawabs were attracted to European ideas in architecture because of their 'foreignness'

❌ 2. The Nawabs chose to live in Villas because they were easier to construct than palaces

❌ 3. The Villa became the backdrop to both the private as well as the court life of the Nawabs

✔️ 4. The Nawabs of Lucknow fancied building palaces that resembled British ancestral homes

Each of the paragraphs given below has a sentence missing which is indicated by a blank. From the choices given below each paragraph, choose the sentence that seems most logically appropriate to complete the paragraph.

SubQuestion No : 27

Q.27 **A study of the social and cultural context of Indian poetry in English reveals several important insights into its origin. Indian poetry in English began in Bengal, the province where the British first gained a stronghold. In addition, this poetry was a largely urban phenomenon, centered in Calcutta. _____. Then, gradually, it moved to other urban centres such as Madras and Bombay. Even today, Indian poetry in English remains largely urban. Moreover, because English was an elite language, Indian poets writing in English came from the upper classes.**

Ans ✗ 1. The British had decided that poetry about India could reach a larger audience if written in Calcutta

✗ 2. The rulers encouraged the natives to write poetry about India only if their mother tongue was English

✗ 3. English was seen as an elite language and so the British felt that only they could use it for poetry

✓ 4. In fact, poetry writing for the first fifty years was confined to a few families who were residents of Calcutta
